

1/8 Off Road Wheel Balancer

Faithful to the philosophy of innovation and product development by Ultimate Racing, we present the new wheel balancer.

After many tests and exchange of opinions with our drivers, we got to the conclusion that unbalanced wheels produced unnecessary vibration to the shock absorber, affecting to both traction and stability of cars while jumping. To take care of this problem we proposed a system to balance wheel weight.

This new tool allows us to know which is the heaviest part of the wheel, so the wheel balancing gum can be applied to the opposite side until the wheel is totally balanced.
