

# KF6505 - 1/8 Buggy Clutch

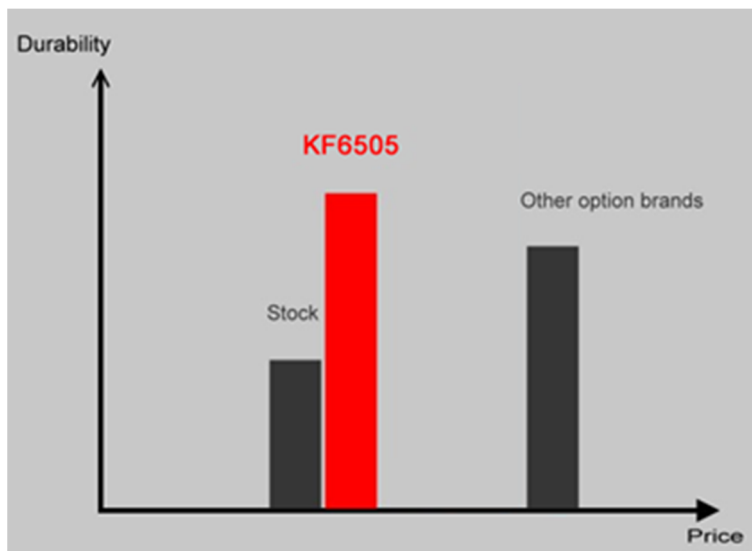

# Housings

If there is one component on your truck buggy or car that is solely responsible for transferring power from your engine to your transmission... it's your clutch. Therefore, choosing the right clutch bell is a decision you should not leave to chance. Choosing the wrong clutch bell can mean overheating, metal fatigue, clutch shoe slippage and outright meltdown.

You simply cannot get a better precision made part for your clutch than the K Factory KF6505 Hardened Steel Clutch Bell. CNC machined from the very high grade steel available, and yet priced lower than others, the KF6505 clutch bell is built for racers who expect the best value items.

Venting cutouts in the clutch bell body not only dissipate heat, a clutch's worst enemy, but it reduces rotating weight and makes it easy to inspect the condition of your clutch shoes. The hardened steel also allows the K6505 clutch bell to maintain its precision engineered balance and roundness at high rpm.

## CLUTCH BELLS 1/8 RACING BUGGY

- KF6505A-12 Ventilated Clutch Bell - 12T
- KF6505A-13 Ventilated Clutch Bell - 13T
- KF6505A-14 Ventilated Clutch Bell - 14T
- KF6505A-15 Ventilated Clutch Bell - 15T
- KF6505A-16 Ventilated Clutch Bell - 16T
- KF6505A-17 Ventilated Clutch Bell - 17T
- KF6505A-18 Ventilated Clutch Bell - 18T
