

# TT3 - Semi Automatic Tire Truer

HARD

## HARD1040 - TT3 Tire Truer

If you are looking for an easy and tough tire truer, the HARD TT3 will satisfy all your demands. The advanced liner guide system and powerful motor will take you into higher level.

The basic idea of a great tire truer is easy to handle and have a strong motor which is not easy to breakdown and great torsion strength. Therefore, we made the motor of TT3 pretty tough and stable in order to deal with the truing process.

The liner guide system is well known as the easy, precision, and convenient system that has been used in many manufacture industries. Drivers basically operating the truer on a stainless track rail which has great accuracy and low wearing function. You will find out it is easier to control when you're sliding the truer because it has a roller that installed between the truer and track rail consistently and smoothly. H.A.R.D TT3 is the first one that combined the liner guide system with the tire truer, so it is absolutely unique than other tire truer products that you can get on the market.

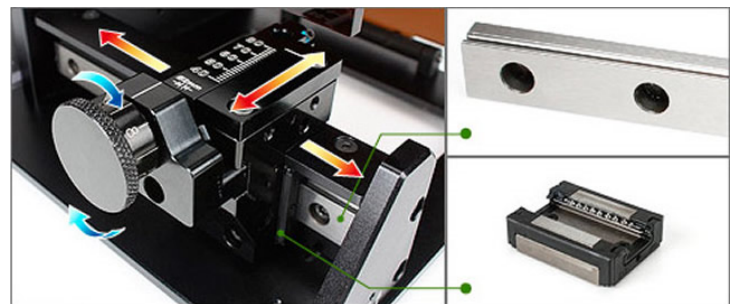

The camber is another component to adjust the angle of tires, so we developed the adjustable camber for different angle demands.
