## High Quality - Cheng-Ho Starter Box Bag

## **Cheng-Ho Starter Box Bags**

The stylish and cool H.A.R.D. colors of grey really give these new bags a fantastic clean look. Not only do they look good but they feel good, too. This is a result of careful selection of several materials used during construction.

By being selective, we not only helped to improve looks but also functionality as well. For example, the majority of the bag is made with hight quality reinforced material.

The **HARD9007** bag is especially designed for small Starter Box, like our HARD H6. The HARD9008 bag is designed for larger starter box, like the Hippo or the H5. Both includes a special pocket for fuel bottle, and are easily combinable with the other Team Magic and HARD bags.

If you want style, convenience and plenty of storage, the new H.A.R.D. series of bags should, without a doubt, be at the top of your list. Their quality materials and H.A.R.D.'s manufacturing expertise makes them the ideal solution for any RC racer.

HARD9007	Small Starter Box Bag
