- 3.5mm light CVA drivetrain with full ball bearings
- Factory Team shock and differential fluids included

RC8.2E

Team Associated has taken all of the refinements from the RC8.2 and have applied them to our electric-power platform-creating the RC8.2e Factory Team Kit! The RC8.2e has already been proven as a winner after TQing and winning the 2011 Sidewinder Nitro Explosion in the capable hands of Ryan Cavalieri. The RC8.2e Factory Team Kit has a long list of new performance parts, making for the best and lightest Associated EP 1/8 scale buggy to date. The RC8.2e starts with the Factory Team +3mm 7075 hard anodized chassis. The new chassis and side-guards shed over half an ounce along with adding 3mm of length to optimize weight distribution and overall handling. Take your electric-powered 1/8 scale buggy game to the next level with the new RC8.2e Factory Team Kit, and drive what the winners drive!
